

ANB 290: Alt. Extension: Science Communication Tools for the Modern Era

Winter Quarter, 2021

When: Wednesdays, 3-5pm + 1-hour “Peer Workshop” per week

Where: Zoom

CRN: 11008 (Sign up for 2-4 Credits)

Science communication is not considered a formal component of a graduate degree; however, the ability to translate scientific work into multiple accessible formats is critical as we interact outside of the academic realm, with everyone from policy-makers to the next generation of researchers. The purpose of this seminar will be to provide scientists of all levels of experience with hands-on practice to improve science communication and outreach skills. The goal is for students to emerge with a “toolkit” for sharing their research, and resources to guide further use of these methods in the future.
